

Microsoft Multi-Tenant Collaboration

Configuring Microsoft Multi-Tenant Collaboration allows organizations to manage multiple tenants in a cloud environment, facilitating cross-organizational collaboration.

Preparing Your Environment

- Have administrator accounts for each tenant.
- Acquiring required licenses.

Master tenant Configuration

- In the Microsoft 365 admin portal, Master tenant configuration.

Adding Child tenants

- Join the child tenants to the master tenant.

Configure users to sync

- Added the users to be synchronized in each tenant via the admin portal.
- Enabling advanced options.

Verification and Testing

- Testing configurations by inviting users from other tenants to collaborate on specific resources
